GETTING STARTED

1. What is HVGC LINEUP?

HVGC LINEUP is the scheduling system for the audio / visual (AV) team. Volunteers say when they're available, see which services they're on, swap roles when they can't make it, and complete the training required to serve. Administrators build the team, assign roles and training, create services, and schedule people.

There are two sides: the **Volunteer** side (everyone has this) and the **Administration** side (admins only). Both are reached from the left-hand menu.

2. Creating an account & signing in

New accounts go through two checks before they can be used:

- 1 On the sign-in page, click **"Create an account."**
- 2 Enter your name, a **username**, email, optional phone, and a password (6+ characters), then click **Create account**.
- 3 **Verify your email** by opening the link sent to your address (if email isn't set up on the server, the link is shown on screen and on the admin's page).
- 4 **Wait for approval** — an administrator approves new accounts. You can sign in once your email is verified and an admin has approved you.
- 5 Sign in with your **username or email** plus your password. Use **Sign out** (bottom-left) when finished.

Forgot your password? Click **"Forgot your password?"** on the sign-in page, enter your username or email, and follow the reset link (emailed, or shown on screen when email isn't configured). The link expires after one hour.

Note: the very first account on a brand-new system becomes an approved administrator automatically, so the team can get set up.

3. Finding your way around

The dark menu on the left is always visible and split into:

- **Volunteer** — Dashboard, My Availability, Services, Role Swaps, Training, My Profile, and this Manual.
- **Administration** (admins only) — Admin Home, People, Roles, Trainings, Schedule, Availability Grid, Swap Approvals.

Your name and account type show at the bottom with **Sign out**. Coloured banners at the top of the page confirm actions or warn you.

FOR VOLUNTEERS

4. Your dashboard

Your home base shows:

- **Training to complete** — required training you must finish before serving.
- **Your upcoming assignments** — services you're on, with a status badge (Scheduled / Confirmed / Declined).
- **Your roles & qualification** — each role and whether you're qualified or still in training.
- **Swaps you can cover** — open requests you're qualified to pick up.

5. Setting your availability

Open **My Availability**.

- 1 Choose **Available** or **Unavailable**.
- 2 Pick a **From date**. Leave **To date** blank for a single day, or set it to mark a whole range at once (every day in the range is saved).
- 3 Add an optional note and click **Save availability**.

Use **Quick mark upcoming Sundays** to flag the next eight Sundays in one click each. Your marked dates are listed on the right; **Remove** clears any entry.

6. Services & the roster

Open **Services** to see upcoming and recent services. Click **Open** on one to view its date, time, location, any **service notes**, the **programme flow document** (if attached), and the full **roster** (who serves in each role).

7. Confirming or declining an assignment

On a service you're scheduled for, under “**Your role this service**” you can **Confirm**, **Decline**, or **Request swap**.

8. Role swaps

Can't make a service?

- 1 On the service page, open **Request swap** under your role, add an optional reason, and post it.
- 2 Qualified teammates see it under **Role Swaps** and click **Volunteer** to cover.
- 3 An administrator **approves** the swap, reassigning the slot. The status becomes **Approved**.

The **Role Swaps** page lists **Swaps you can cover** (only roles you're qualified for) and **Your swap requests** (with status; cancel one that's still open).

9. Service notes

On any service page, the **Notes** panel lets anyone leave a note about that service. You can delete notes you wrote.

10. Training & videos

Open **Training** to see what's assigned and whether it's **To do** or **Completed**. Click **Start** to open a training, which may include:

- A **training video** that **automatically pauses the moment you switch tabs or leave the window** — so you actually watch it.
- Written content.
- A **“Mark this training complete”** button.

You must complete every required training for a role before you can be scheduled in it (see section 20).

11. Your profile

My Profile lets you update your name and phone, and shows your roles with their qualification status. Email and account type are managed by an administrator.

REFERENCE

20. The qualification rule

The heart of the system: **a volunteer can only be scheduled for a role once they have completed every required training linked to that role.**

- Assigning a role auto-queues its required training.
- Until it's done, the person shows **“Training X/Y”** and can't be assigned (admins may override).
- The same rule decides which open swaps a volunteer may cover.

21. Quick FAQ

- **I just registered but can't sign in.** Open the email verification link, then wait for an administrator to approve your account — both are required.
- **I can't be assigned to a role.** You likely haven't finished its required training — check **Training**.
- **The training video stopped.** Intentional — it pauses when you leave the window. Return to the tab and press play.
- **A week off shows many rows.** A range is stored as one entry per day; that's normal and lets schedulers see each day.
- **I can't see the admin menu.** Those tools are for administrators; ask an admin to grant access from **People**.
- **I forgot to confirm and the service passed.** Confirming is a courtesy so the team knows you're coming; it doesn't remove you from the roster.
